# Subject index of volume 130

Acid-base
  intracellular pH, chemoreception, 139
Airways
  airflow, modeling, 201
  morphometry, 69
  upper, collapsibility, 57
  upper, geometry, resistance, 317
Allometry
  comparative, mammalian development, 327

Biomarkers
  oxidative stress, 189
Bird
  chicken, 43
Body mass
  Stahl's residual mass exponent, 327
Brainstem
  pre-Bötzinger complex, 235
  rostral ventrolateral medulla, 121

Carbon dioxide
  hypercapnia, expiratory motor output, 235
  hypercapnia response, central, 139
Carbon monoxide
  endogenous production, 151
Carotid body
  chemoreceptor, model, 99
  post-hypoxic frequency decline, 113
  signal transduction, 223
  signal transduction, free iron chelation, 21
Chelators
  ciclopirox olamine, 21
  desferrioxamine, 21
Chemoreception *see Chemosensitivity*
Chemoreceptors
  carotid body, model, 99
  central, pH stimulus, 139
  peripheral, 223
Chemosensitivity
  central, $CO_2$, 265
  central, RTN, 121
  rhythm generator, 235
$CO_2$ *see Carbon dioxide*
Control of breathing
  c-Fos expression, 265
  carotid body, 99, 223
  central chemoreceptors, 139
  developing chick, 43
  hypoxic response, 113
  peripheral chemoreceptors, 21
  rhythm generation, 235
  RTN, 121
  sleep, 253
  sympathetic outflow, 3

Development
  chick embryo, 43
  mammals, 327
Dextran
  surfactant, 169
Diameter
  airway, 317
Diffusing capacity
  pulmonary, red cells, 181
Diffusion
  alveolar-capillary, 181
Disease
  acute lung injury, tacrolimus, 89
  branchial asthma, 79
  emphysema, 69
  obstructive pulmonary, 305

Egg
  chick, chorioallantoic membrane, 43
Enzyme
  erythropoietin, 223
  heme oxygenase, 151
Exercise
  chest wall vibration, 305
  forearm muscle, oxidative stress, 189

Flow
  limitation, inspiratory, 57
  respiratory air, 201

Gall bladder
  mechanical stimulation, respiratory muscles, 285
Gas
  He, $SF_6$, 69
Gas exchange
  mixing, intrapulmonary, 69
  pulmonary, 181
Gene
  glycine receptor, Glral, 33

PII: S0034-5687(02)00062-2

Hypoxia
blunted response, 223
carotid body, 99
hyperventilation, CO, 151
inducible factors (HIF), 223
post-hypoxic frequency decline, 113

Immune cells
T cells, lung injury, endotoxin, 89
Inhibitor
heme oxygenase pathway, 151
Iron
free, carotid body, 21

Lung
model, asymmetric bifurcation, 201

Mammals
cat, 235, 285
human, 69, 189
humans, 3, 57, 161, 201, 223, 253, 275, 305
mouse, 33, 79
mouse, harvest, 317
rabbit, 293
rat, 21, 113, 121, 139, 151,265
rat, giant pouched, 317
sheep, 89
Mechanics of breathing
chest wall vibration, 305
Mediators
interleukins, 89
neurokinin A, 265
reactive oxygen species, 223
substance P, 265
Membrane
diffusion resistance, 181
Metabolism
developing chick, 43
Methods
axisymmetric drop shape analysis, surfactant, 169
nerve conduction time, magnetic stimulation, 275
Model
airflow dynamics, 201
airway resistance, asymmetric branching, 317
carotid body chemoreceptor, 99
Muscles
diaphragm, compound action potential, 275
diaphragm, parasternal intercostals, electromechanical efficiency, 293
forearm, oxidative stress, 189
respiratory, gallbladder mechanical stimulation, 285
upper airways, 57
upper airways, dilators, genioglossus, 161
Mutant
mouse, oscillator, 33

Nerve
phrenic, conduction time, 275
phrenic, stimulation, 57
respiratory motor, chemostimulus, 235
Neurochemicals
sleep-related, 253
Nucleus
retrotrapezoid, cytoarchitecture, 121

Oxygen
consumption, 43
dissociation curve, carotid body, 99

Pattern of breathing
apnea, obstructive, 161
glycine receptor-deficient mouse, 33
hypoxic response, 113
modulation by sympathetic nerve activity, 3
Pharmacological agents
acetylsalicylic acid, 189
ciclopirox olamine, 21
desferrioxamine, 21
tacrolimus (FK-506), 89
Pressure
blood, arterial, 223
inspiratory, abdominal, 293
Protein
albumin, surface tension, 169

Receptor
glycine, 33
Resistance
airways, model, 317
diffusion, red cells, 181

Scaling
allometric, 327
Sleep
apnea, 223
depression of ventilation, 253
obstructive apnea (OSA), 57, 161
Stress
oxidative, fatiguing exercise, 189
Surfactant
pulmonary, albumin, 169
Sympathetic nerve
activity, respiratory, vasomotor outflow, 3

Tachykinin
neurons, activated by $C0_2$, 265

Upper airways
atonia in sleep, 253
bronchoconstriction, bronchial hyperreactivity, 79
patency, collapse, 161

Ventilation
alveolar, 69
hypoventilation, sleep, 253
Volume
lung, 293
